**Chamber Spotlight**  
**Dental Elements of Wellsville**  
**By: Elliot Kelley**

Our eighteenth spotlight for the Wellsville Chamber of Commerce is Dental Elements of Wellsville (616 Main Street, Wellsville). Pam Borchers, the Operations Manager, co-operates the business with Dr. Jake Meggison, DDS. Dental Elements of Wellsville understands the importance of embracing technology when practicing dentistry in developing procedures that are best for their clients. While using this philosophy, they strive to provide dental services that make their patients feel comfortable and reduce the anxiety that affects some people when considering dental services.

Dr. Meggison moved from Berryton and has always been attracted to small towns. Borchers had visited Wellsville multiple times and had enjoyed the community, as well. With the community in mind, Borchers and Dr. Meggison began the operations of Dental Elements of Wellsville in 2012. Although there is not a set routine each day, they enjoy seeing patients daily and assisting with all their dental needs. Their hours of operation are 8:00 a.m. to 5:30 p.m., Monday through Thursday and 8:00 a.m. to 2:00 p.m. on Friday. With a vision of uncompromising excellence in dentistry, the Wellsville location specializes in teeth cleaning, whitening options, dental crowns, and dental implants, braces (clear/Invisalign).

With four locations (Shawnee, Leawood, Wellsville and Grandview), Dental Elements provides many options for its clientele. Having multiple locations also provides their clients with excellent services that are in convenient proximities.

Dental Elements prides itself on the unique opportunity it provides its patients through “The Freedom Plan”, which is a way for people to obtain dentistry through a “membership” plan. Dental Elements has the patient in mind when offering their three Freedom Options. To learn more about this amazing new dentistry plan, call 785.883.2117.

As with most dental practices, one of their biggest challenges is helping clients face their apprehensions of going to the dentist, along with the paranoia of the pandemic. With proper education and their commitment to relieving anxieties, Dental Elements helps clients through these fears. They stress that good oral health care, such as daily brushing and flossing can keep bacteria under control, however, proper oral hygiene must be monitored as well.

Dental Elements truly enjoys the Wellsville community and its citizens. They look forward to seeing recurring and new patients. For more information about Dental Elements, visit their website at [www.dentalelementskc.com](http://www.dentalelementskc.com).
