

Candidate for City Council: Laeken Frazier

I'm seeking a position on City Council because my family and I have lived in this community for almost 10 years, where I have taught Elementary Art for 7 years and my kids are being raised. I feel a community like ours needs tradition and innovation to intertwine.

As a former business owner and teacher, I feel that I possess a unique ability to see both sides of each story and continue to be frugal yet ambitious when planning.

I'm most passionate about strengthening community engagement, building on local assets and preserving Wellsville's character and charm while balancing the need for growth.

New business opportunities need to make sense for the existing community and contractual language needs to be developed to protect our city's future.

Staffing needs to be evaluated based on current needs and then evaluated as new contracts and growth occurs. A city manager role could be entertained once new growth has been contracted.

Thank you for your time and consideration,

Laeken Frazier
